FOREWORD

For the past eleven years, the educational characteristics in this document have been presented in essentially the same format to allow comparisons over time. Each issue has been modified to include available characteristics; therefore, comparisons will vary in the number of years data are available. Such comparisons will yield changes in descriptive trends for districts as well as for the State.

The 1981 edition contains 97 ranked characteristics that are arranged alphabetically, by district name, and numerically, in order of magnitude of the particular characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable. Users should give attention to the footnotes and sources that are supplied at the end of each table as well as the Explanatory Notes at the beginning of this document. This information is supplied to further clarify the characteristics of interest.

We urge you to use the presented information with caution. High, low or median values for the characteristics presented in this publication do not necessarily illustrate quality in education. Many other factors must be considered when searching for quality education. The updated information may be useful to you in preparing local profiles, public information brochures and other such sources of information.

For the past seven years, the Office of Research, Management Information Section, has provided District Profiles based on the numerous characteristics found in this document. These profiles will be available again upon request.

We continue to desire your comments as to how you use the information within this publication and its importance to you. Your recommendations for change as well as any questions concerning the content of this publication are invited and encouraged.

EXPLANATORY NOTES

The 1981 edition of *Rankings* presents 97 tables of ranked characteristics related to public education in South Carolina. The characteristics are arranged alphabetically by school district name and numerically in order of magnitude of the particular characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable.

Statistics for Felton Laboratory School and South Carolina Youth Services institutions were excluded from all tables except Tables 53-57, ranking average years of experience of the various staff categories, and Table 69 which ranks average teacher salaries. The reporting method used in the source documents for these tables did not allow such exclusions.

The user should review thoroughly the applicable comments below before using the tables presented in this publication.

Population

Population estimates used in the tables were provided by the Division of Research and Statistical Services of the State Budget and Control Board. These estimates reflect population as of July 1, 1979.

Economic

Tables relating to employment in various categories (Tables 10-16) display estimates of nonagricultural wage and salary employment by the county in which the work was performed, rather than by the county in which the workers resided. This reporting was consistent with the reporting in previous editions. The State figures may not equal the sum of county figures in the employment tables due to rounding procedures and inability to allocate some workers in the South Carolina totals to specific counties.

In order to maintain the confidential nature of data reported by employers, information was not shown in the source document for industries with fewer than three reporting units or when any firm or two firms combined accounted for 80 percent or more of employment in the industry.

As in the past four editions, the labor force statistics used to calculate unemployment percentages (Table 17) were reported on a residence basis rather than by place of work and were adjusted to the Current Population Survey Benchmark.

Table 18 gives the 1979 average weekly wage of workers covered in employment. The data reported in the source document were based on employment and payroll information reported by employers to the Unemployment Compensation Division of the South Carolina Employment Security Commission on their regular quarterly tax reports.

Pupil

Prior to the 1973-74 school year, the official pupil count was the 10-day cumulative enrollment at the end of the 180-day reporting period. The official pupil count for 1973-74 through 1977-78 was the 35-day cumulative enrollment at the end of the 180-day reporting period. Thereafter, the official pupil count has been the Average Daily Membership (ADM) at the end of the 135-day accounting period. Unless otherwise noted, kindergarten has been included in membership. Tables 30-35 present enrollment figures rather than ADM figures to allow comparisons.

Table 49 is an addition for this year. The table reports the number of dropouts for Grades 9-12 as a percent of the enrollment for Grades 9-12 for the 1979-80 school year. Tables in past issues have reported total dropouts for Grades 1-12.

Professional Staff

Unless otherwise stated, statistics for personnel in special education schools were included in tables relating to professional staff. Personnel in multidistrict organizations were not included in the various staff tables due to the impracticality of allocating such staff to individual districts.

Last year's publication omitted the table showing teacher turnover rates due to changes in the reporting system which did not allow compatibility of data. The table has been reinstated in this edition (Table 64).

Financial

The financial tables include expenditures and revenues for area vocational centers and county boards. The area vocational center monies were prorated among the districts on the basis of the number of pupils attending the centers (See Appendix A). The county board monies were prorated on the basis of ADM for the respective districts (See Appendix B). Total expenditure and revenue amounts in the tables were rounded to dollars, while per pupil amounts were rounded to cents.

The pupil counts used in the computation of expenditures and revenues per pupil were the average daily memberships for the 135-day reporting period. Kindergarten pupils not classified as handicapped or homebound were counted as half-day pupils.

Current operating expenditures reported in this publication included expenditures for adult education, nonpublic schools and public libraries. These expenditures were included also in the Community Services Account, which is a component of Auxiliary Services (Table 92). See Appendix C for a complete listing of accounts used in the computation of revenues and expenditures.

[a] Preliminary 1979 data from South Carolina, Employment Security Commission, Research and Analysis, *South Carolina Manpower in Industry*, August 1980.

[b] The labor force data used in deriving these figures were adjusted to the current Population Survey Benchmark and represent employment and unemployment by place of residence. These data are not comparable to place-of-work data. Workers involved in labor disputes are included among the employed. Total employment includes nonagricultural wage and salary employment, agricultural workers, nonagricultural self-employed, unpaid family and domestic workers.

[c] State totals may not equal the sum of county figures due to rounding.

[a] South Carolina, State Department of Education, Office of School Food Services, reports from school districts for the month of October 1979.

[b] South Carolina, State Department of Education, Office of Finance, Accounting Section, "45-Day Average Daily Membership Summary, 1979-80."

[c] Due to the fact that eligibility of students is based on figures submitted for the month of October, while fall membership is based on the average daily membership for a 45-day period, a percent figure of more than 100 can occur.

County Board Ratios

Below is a listing of multidistrict counties along with the corresponding school districts for which county board monies were prorated. The ADM for the county is displayed as well as the ADM and percents attributable to the school districts within the county. Single-district counties are not shown since the tables in this publication include all county board monies in the school district's revenues and expenditures. The rounded percents shown below will usually give the prorated amounts correct to the nearest dollar.
